Directions for Pot Culture

Plant the bulbs in a rich sandy loam any time from September to December, placing a few pieces of broken crockery or charcoal in the bottom of the pots for drainage. Water thoroughly and set pots outdoors under a depth of 4 to 6 inches of soil or coal ashes to prevent freezing. Or after carefully watering the pots, place in a cool dark cellar. Don't let soil get dry. Not less than six weeks later when tops are an inch or two high bring gradually to light. In the heat of the living room they will require frequent watering. Shade slightly if plants remain dwarf.

10 to 15 flower stalks, with a profusion of large, delicately scented white flowers with orange cups.

Very ornamental when grown in a bowl of shallow water. Use shining white pebbles or small shells to keep it from turning over when in bloom. Start a dozen bulbs at intervals for a succession of flower throughout the Winter.

They may be started in full light. Growth starts in a few days, reaching maturity in six weeks. Twenty cents each.

CALLA LILIES

WHITE CALLA. Lily of the Nile. Extra large bulbs, 30 cents each; \$3.00 per doz.

SPOTTED CALLA. Flowers white; foliage green, spotted white, 40 cents each; \$3.25 per doz.
